
(a) $I(f_x, f_y)$
f_y [mm^{-1}]
f_x [mm^{-1}]
I [decades]
(b) Azimuthal Average
$\langle I \rangle(f)$ [decades]
f [mm^{-1}]
$L_s = (2.72 \pm 0.04) \times 10^{12}$
$L_o = (1.29 \pm 0.03) \times 10^{12}$
$S_s = 0.907 \pm 0.001$
$S_o = 0.706 \pm 0.012$
$(n = 30)$
